

Ready for the future.

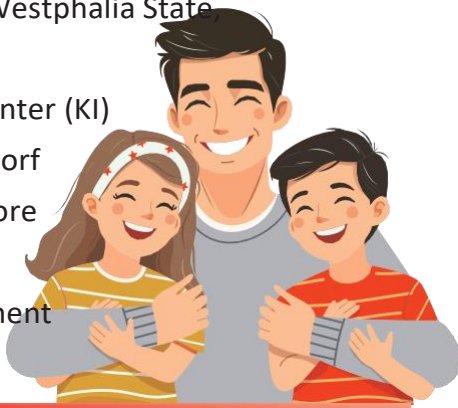

Support and promotion of fathers' groups in the Warendorf district

Your fathers' group – we accompany and support you!

Fatherhood is a significant and enriching task – and at the same time, it is associated with many challenges. For men with migration experience, these challenges are often particularly great. The loss of home and familiar roles or social status can lead to insecurity in everyday family life. Fathers' groups can provide guidance and promote social participation. They offer fathers a space for exchange and joint activities.

With the corresponding funding from the Ministry for Children, Youth, Family, Equality, Refugees and Integration of the North Rhine-Westphalia State, the Municipal Integration Center (KI) in the Warendorf district therefore supports the establishment

and accompaniment of fathers' groups.

If you, as an association, initiative, parents' representative, organization, or dedicated individual, would like to establish a fathers' group, we would be happy to support you professionally, organizationally, and through relevant workshops. We can also provide funding for activities developed within the group – such as excursions or joint events – and cover fees for group leaders.

There are many different options and concepts for setting up fathers' groups.

**Get in touch with us –
we look forward to hearing your ideas!**
